ABOUT ME

Born on June 9, 1991, I completed the basic education in 2006 and general secondary education in 2008. Graduated in Computer Systems Programming from the Instituto Industrial e de Computação Armando Emílio Guebuza in 2014 and attended the Systems Administration course of Computing Information and Networks at the University of São Tomás de Moçambique (1st year only).

With around 8 years of professional experience. Throughout this period I came across situations that prepared me to increasingly face the difficulties that may arise in the labor sector.

My biggest project was developing an AI solution, capable of identifying and helping to mitigate possible accidents at work. I used emerging technologies on the market, with emphasis on Python.

I intend to study a degree in Computer Systems Programming and Telecommunications at the Escola Superior de Ciências Náuticas de Moçambique. My academic background, combined with the practical skills acquired, motivates me to continually seek new opportunities for learning and growth in the technology area.

WORK EXPERIENCE

Software developer

ITGest Mozambique [04/2019 – Current]

City: Maputo | **Country:** Mozambique

Software developer:

- Working on the implementation of *BM Eventos* at Banco de Moçambique.
